

HAMZATHUL DILSHAD C

Software Engineer | Angular Developer | MEAN Stack Developer

Malappuram, Kerala | +91-75599-09796 | diluhd99@gmail.com | linkedin.com/in/dilshhh | github.com/hdaamzz | leetcode.com/u/hdaamzz

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building Governance, Risk, and Compliance (GRC) products and full-stack MEAN applications. Currently contributing to scalable, user-friendly Angular systems at Jethur, collaborating across multiple project teams and applying AI-driven development practices. Skilled in Angular, Express.js, MongoDB and Node.js, with a strong foundation in clean architecture, state management, real-time technologies (WebRTC, Socket.io), and cloud deployment (AWS). Brings additional exposure to NgRx and MobX state management, RESTful API design, and CI/CD-driven delivery workflows.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: Angular (v18+), NgRx, MobX, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & APIs: Node.js, Express.js, RESTful API Design and Development, Socket.io, Authentication and Authorization

Databases: MongoDB, Mongoose, MySQL, Firebase, PostgreSQL

Architecture: SOLID Principles, Repository Pattern, MVC, Clean Architecture

DevOps & Deployment: CI/CD Pipelines, AWS EC2, Docker, Nginx, Vercel, Render

Domain: Governance, Risk, and Compliance (GRC), Risk Modules, Compliance Workflows

Security: JWT, OAuth 2.0, Bcrypt, RBAC

Practices: AI-Driven Development, Agile/Cross-functional Collaboration, Code Review, Debugging and Troubleshooting, Performance Optimization

Tools & Version Control: Git, GitHub, Postman, Figma, Stripe, Razorpay, Nodemailer

Others: DSA, Redis, WebSockets, WebRTC

PROFESSIONAL EXPERIENCE

Software Engineer

Jul 2025 – Present

Jethur | Kochi, Kerala | Hybrid

- Contributing to the development of an enterprise Governance, Risk, and Compliance (GRC) product, working across multiple GRC modules alongside cross-functional project teams
- Collaborated with the Angular team to build and maintain a user-friendly, scalable front-end system using Angular, Bootstrap, and MobX for state management
- Applied AI-driven development practices to accelerate feature delivery and improve code quality
- Streamlined CI/CD pipelines, automating build, test, and deployment workflows
- Enforced clean code design patterns (SOLID, modular architecture) to strengthen system performance and maintainability
- Collaborated with backend and QA teams to translate GRC business requirements into scalable technical solutions

PROFESSIONAL PROJECTS

EvenDigo – Event Management and Booking System

Live: evendigo.space | GitHub: github.com/hdaamzz/EvenDigo

- Built comprehensive event platform serving 50+ active users with event creation, editing, and analytics for organizers
- Implemented JWT auth with RBAC and real-time Socket.IO chat supporting 100+ concurrent users
- Integrated Stripe payment processing 200+ transactions with tickets, coupons, refunds, and subscription management
- Delivered an analytics dashboard and financial tracking module; architected a scalable backend with Repository Pattern, cutting code duplication by 40%

Tech Stack: Node.js, Express.js, Angular, NgRx, TypeScript, MongoDB, JWT, Socket.io, Stripe, Tailwind CSS

ShopEasy – E-commerce Platform

Live: shopeazy.evendigo.space | GitHub: github.com/hdaamzz/shopeazy

- Engineered scalable REST APIs handling 1000+ products and 300+ daily requests; crafted a mobile-first UI that improved engagement by 45%
- Added Razorpay support with multiple payment options and configured an Nginx reverse proxy, reducing response time by 35%
- Created an admin dashboard for order management, inventory tracking, and real-time sales analytics; deployed on AWS EC2 with Docker

Tech Stack: Node.js, Express.js, MongoDB, Nginx, Razorpay, Bootstrap, AWS EC2, Docker

RingRing – Video Calling Platform

Live: ring-ring-nine.vercel.app | GitHub: github.com/hdaamzz/RingRing

- Engineered secure authentication using Firebase OAuth, JWT, and HttpOnly cookies; applied a modular backend design with TypeScript, Dependency Injection, and Repository Pattern, reducing coupling by 50%
- Designed a responsive Angular 19 UI with Signals and reusable components; optimized load time by 40% through lazy loading
- Integrated WebRTC for peer-to-peer video calling with real-time connection and unique phone number assignment

Tech Stack: Angular 19, TypeScript, Node.js, Express, MongoDB, Tailwind CSS, Firebase Auth, JWT, WebRTC

PingPoll – Real-Time Polling and Chat Platform

Live: pingpoll.vercel.app | GitHub: github.com/hdaamzz/PingPoll

- Delivered real-time polling and chat using WebSockets with instant updates supporting 50+ concurrent users
- Implemented Firebase OAuth with JWT sessions; built a modular backend with TypeScript, DI (TSyringe), Repository Pattern
- Established a responsive Angular 19 UI with Signals, guards, interceptors, and optimized lazy loading

Tech Stack: Angular 19, TypeScript, Node.js, Express.js, MongoDB, Socket.io, Firebase Auth, Tailwind CSS

ADDITIONAL PROJECTS

BlogBee — CMS

Live: blog-bee-nine.vercel.app | GitHub: github.com/hdaamzz/BlogBee

- Built a full-stack CMS with user authentication, article CRUD, and an admin dashboard for content management
- Added MongoDB schema validation middleware to enforce data integrity across content submissions

Tech Stack: Angular, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

UMS – User Management System

GitHub: github.com/hdaamzz/SMS-NgRx

- Developed a CRUD-based user management system with secure authentication and role-based access control (RBAC)
- Integrated NgRx for centralized state management across the application

Tech Stack: Angular, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, NgRx

EDUCATION

MEAN Stack Development Intensive Bootcamp Certification

Mar 2024 – Jul 2025

Brototype, Calicut

Bachelor of Computer Applications (BCA)

2020 – 2023

PPTM College of Arts and Science, University of Calicut
