HAMZATHUL DILSHAD C

Software Engineer | Angular Developer | MEAN Stack Developer
Malappuram, Kerala | +91 7559909796 | diluhd99@gmail.com | linkedin.com/in/dilshhh | github.com/hdaamzz | hamzathuldilshad.site

PROFESSIONAL SUMMARY

Software Engineer with experience building enterprise Governance, Risk, and Compliance (GRC) software in Angular, and full-stack MEAN applications. Skilled in Angular, TypeScript, Node.js, Express.js, and MongoDB, with hands-on work in state management (NgRx, MobX), real-time features (WebRTC, Socket.io), secure authentication (JWT, OAuth, RBAC), and AWS deployment.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, SQL
Frontend: Angular (v18+), NgRx, MobX, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend & APIs: Node.js, Express.js, RESTful API Design, Socket.io / WebSockets, WebRTC
Databases & Caching: MongoDB, Mongoose, MySQL, PostgreSQL, Firebase, Redis
Architecture: SOLID Principles, Repository Pattern, MVC, Dependency Injection
DevOps & Deployment: AWS EC2, Docker, Nginx, Vercel, Render
Security: JWT, OAuth 2.0, Bcrypt, RBAC
Payments & Integrations: Stripe, Razorpay, Nodemailer, Firebase
Tools: Git, GitHub, Postman, Jira, Figma
Practices: AI-Assisted Development, Agile, Code Review, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Engineer **Feb 2026 – Oct 2026**
Jethur | Kochi, Kerala | Hybrid

- Developed Angular screens for the risk assessment and audit planning modules of an enterprise GRC product, including approval workflows and evidence upload
- Managed complex form and workflow state with MobX, keeping multi-step approval screens in sync
- Built reusable UI components with Angular and Bootstrap, applying SOLID and modular architecture to improve maintainability
- Worked with backend and QA teams to turn GRC business rules into Angular features and API integrations
- Used AI-assisted development tools to speed up feature delivery and code reviews

KEY PROJECTS

EvenDigo – Event Management and Booking System
GitHub: github.com/hdaamzz/EvenDigo

- Built an event platform for 50+ active users, with event creation, editing, and analytics for organizers
- Implemented JWT authentication with RBAC and real-time Socket.IO chat supporting 100+ concurrent users
- Integrated Stripe payments, processing 200+ transactions with tickets, coupons, refunds, and subscriptions
- Delivered an analytics dashboard and financial tracking module; structured the backend with the Repository Pattern to reduce code duplication

ShopEazy – E-commerce Platform
GitHub: github.com/hdaamzz/shopeazy

- Designed REST APIs for a catalog of 1000+ products and a mobile-first storefront UI
- Added Razorpay checkout with multiple payment options
- Created an admin dashboard for order management, inventory tracking, and sales analytics
- Deployed on AWS EC2 with Docker behind an Nginx reverse proxy

RingRing – Video Calling Platform

Live: ring-ring-nine.vercel.app | GitHub: github.com/hdaamzz/RingRing

- Integrated WebRTC for peer-to-peer video calling, with a signaling server for connection setup and a unique virtual phone number per user
- Secured sessions using Firebase OAuth, JWT, and HttpOnly cookies on a TypeScript backend with Dependency Injection
- Delivered a responsive Angular 19 UI with Signals, reusable components, and lazy-loaded routes

PingPoll – Real-Time Polling and Chat Platform
Live: pingpoll.vercel.app | GitHub: github.com/hdaamzz/PingPoll

- Shipped live polling and chat over WebSockets, syncing votes and results instantly across 50+ concurrent users
- Handled vote validation and live result aggregation on a TypeScript backend using TSyringe for DI
- Protected routes with Angular guards and interceptors for token handling

ADDITIONAL PROJECTS

BlogBee – CMS
Live: blog-bee-nine.vercel.app | GitHub: github.com/hdaamzz/BlogBee

- Built a full-stack CMS with user authentication, article CRUD, and an admin dashboard for content management
- Added MongoDB schema validation middleware to enforce data integrity across content submissions

UMS – User Management System
GitHub: github.com/hdaamzz/SMS-NgRx

- Developed a CRUD-based user management system with secure authentication and role-based access control (RBAC)
- Used NgRx for centralized state management across the application

EDUCATION

MEAN Stack Development Intensive Bootcamp Certification **Feb 2024 – Jan 2026**
Brototype, Calicut

Bachelor of Computer Applications (BCA) **2020 – 2023**
PPTM College of Arts and Science, University of Calicut
